

**Topic: To tune high-quality audio (Hi-Fi) by applying surveying technique**

**Date: 29<sup>th</sup> October**

**Time: 19:00 – 21:30**

**Speaker: Ivan To**

It was a lovely night, a group of friends, who are working in engineering surveying or relating field, assembled at Ivan's wonderful house, listened the attractive sounds which created from the high-end audios. Then Ivan said, *"Audiophiles try to listen to music at a quality level that is as close to the original performance as possible!"* Even though I'm not an audiophile, I've still gained this *"live"* feeling on the scene, it's amazing!

Ivan To, who has over 20 years experience in studying high-end audios, gave us a seminar of adopting survey techniques to tune the high quality audio on 29<sup>th</sup> October 2010. The sounds of nature accompanied with a robust wine and snack, nine people enjoyed a fruitful night finally!

We really earned a lot, million thanks, Ivan!

*Reported by Morris Ng – Director of Social Affairs*

*Lam Lit Yin (Right, Chairman of HKIES) presented souvenir to Ivan To (Left) at Ivan's home.*

*Have Ivan used these survey equipments to tone his high-end audios?*

*Everyone concentrated during the seminar.*

*We enjoyed the wonderful time as well.*

*At last, let's took a group photo!*
