**HKIES interviewed with LSGI**

Reported by: LAM Lityin (Chairman)

Representatives of HKIES had an pleasantly interview with the Department Head of The Department of Land Surveying and Geo-Informatics (LSGI), Prof. John SHI, on 02-Sep-2014. We exchanged our views on some common interested issues.

As the Higher Diploma program of Geomatics will be cancelled after 2016, both parties concerned the lack of graduates and impact of local land surveying industry. Besides, we all agreed that the profession should take action echoing the BIM (Building Information Modelling) trend. Moreover, HKIES and LSGI would continuously co-organise different kinds of CPD event in future for the development of the surveying industry.

We exchanged souvenirs for this memorable meeting at the end of the interview.

HKIES presented souvenir to LSGI:
